COMPARATIVE RESUME GENERATION USING MULTIPLE LLMS

In fulfillment of the requirements for the

21st Century IT Skills
Elective Subject

Submitted by:

Undaloc, Ruvi Anne A.
AB Psychology 2D

Class Schedule: MW 6:00 PM to 7:30 PM

Submitted to:
Gabriel I. Quibod
Instructor

April 2026
Ateneo de Davao University, Roxas Ave, Poblacion District, Davao City, 8000 Davao del Sur

PROMPT

I. The LLM's used:

LLM #1 - Replit

LLM #2 - Bolt.new

The following is the original prompt used for both LLM's

I. Create a one-page professional resume for job application using the following details:

Full name - Anne Ajoc

Contact Information - rundaloc@addu.edu.ph

Education - Ateneo de Davao University

Skills - Critical Thinking, Problem Solving, Teamwork

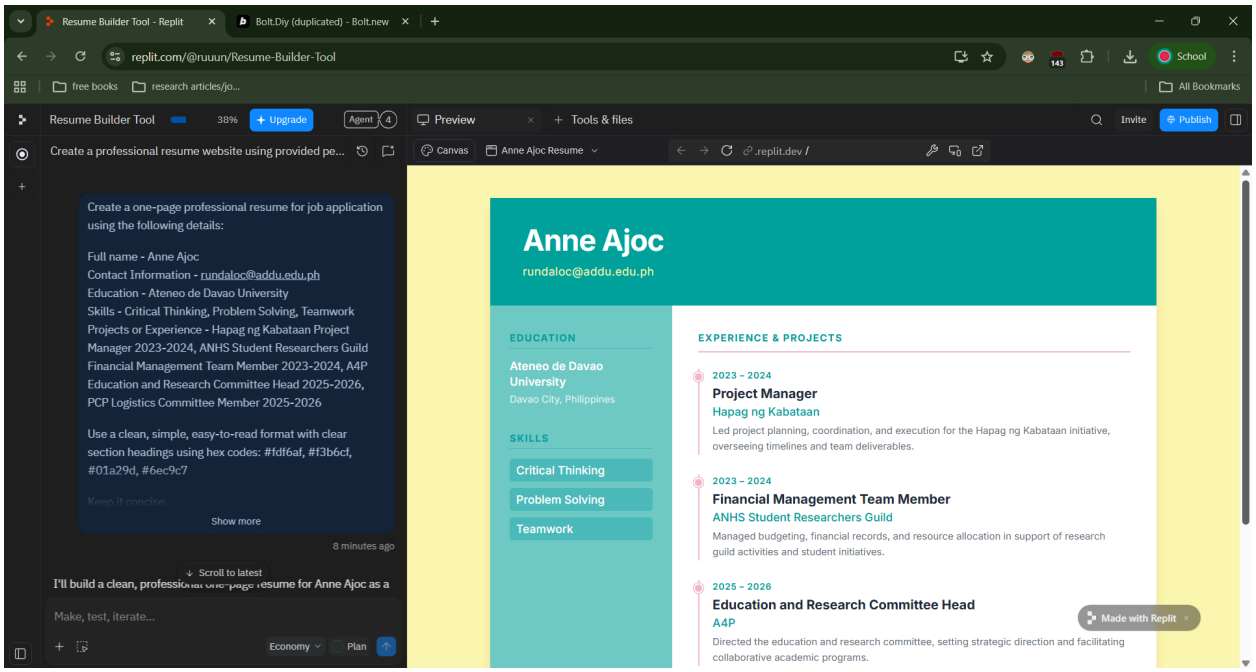
Projects or Experience - Hapag ng Kabataan Project Manager 2023-2024, ANHS Student Researchers Guild Financial Management Team Member 2023-2024, A4P Education and Research Committee Head 2025-2026, PCP Logistics Committee Member 2025-2026

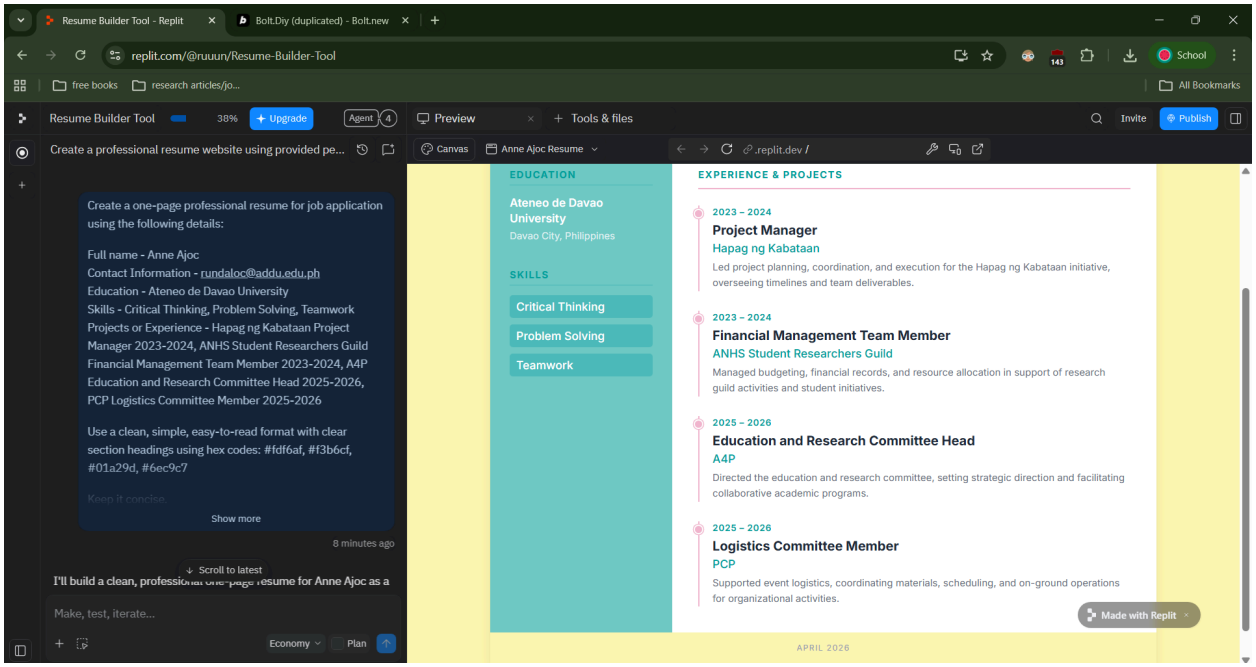
Use a clean, simple, easy-to-read format with clear section headings using hex codes: #fdf6af, #f3b6cf, #01a29d, #6ec9c7

Keep it concise.

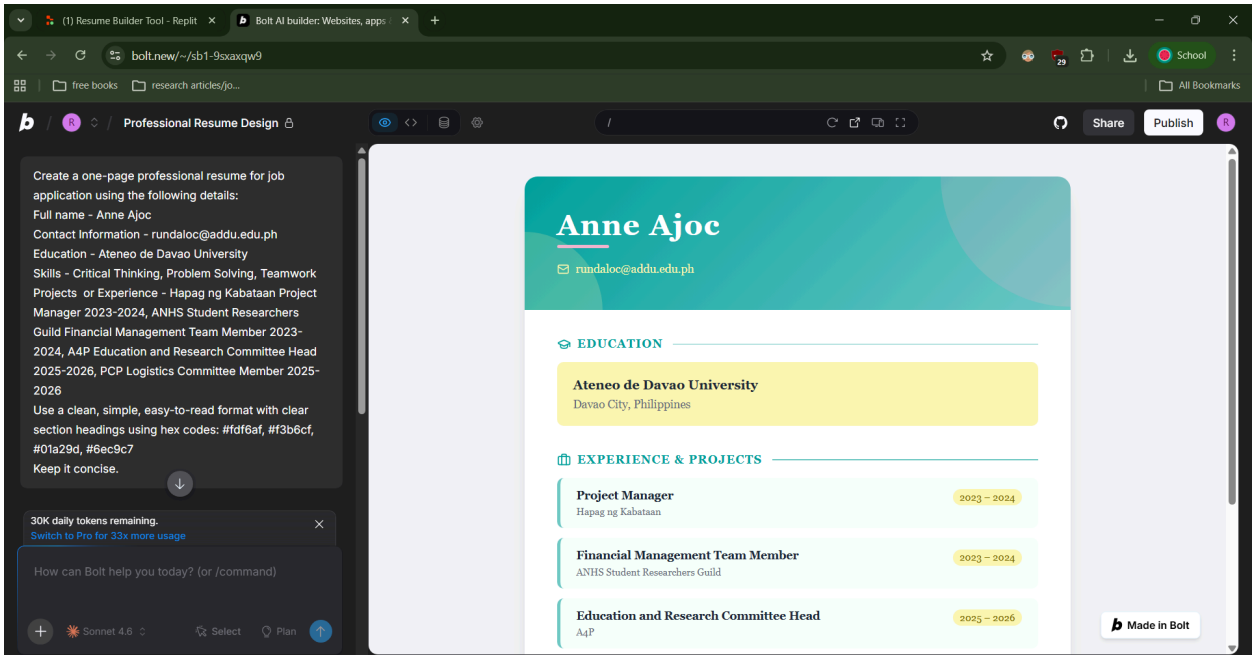
LLM OUTPUTS

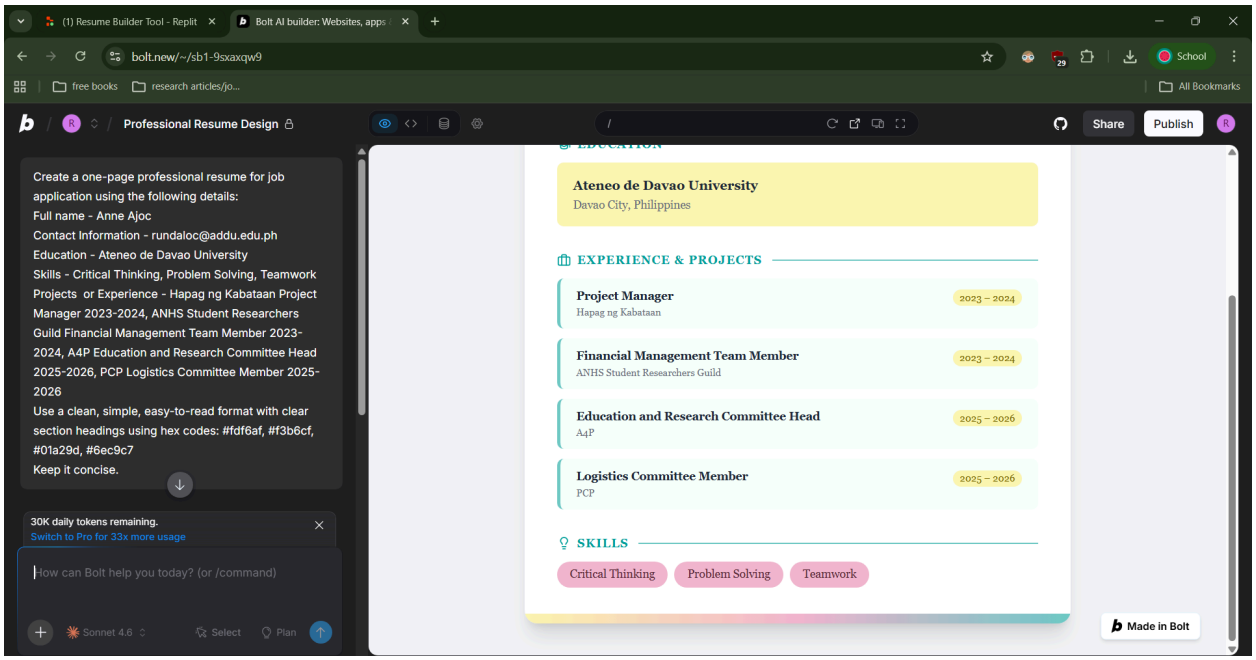
I. Output of the initial prompt on Replit:



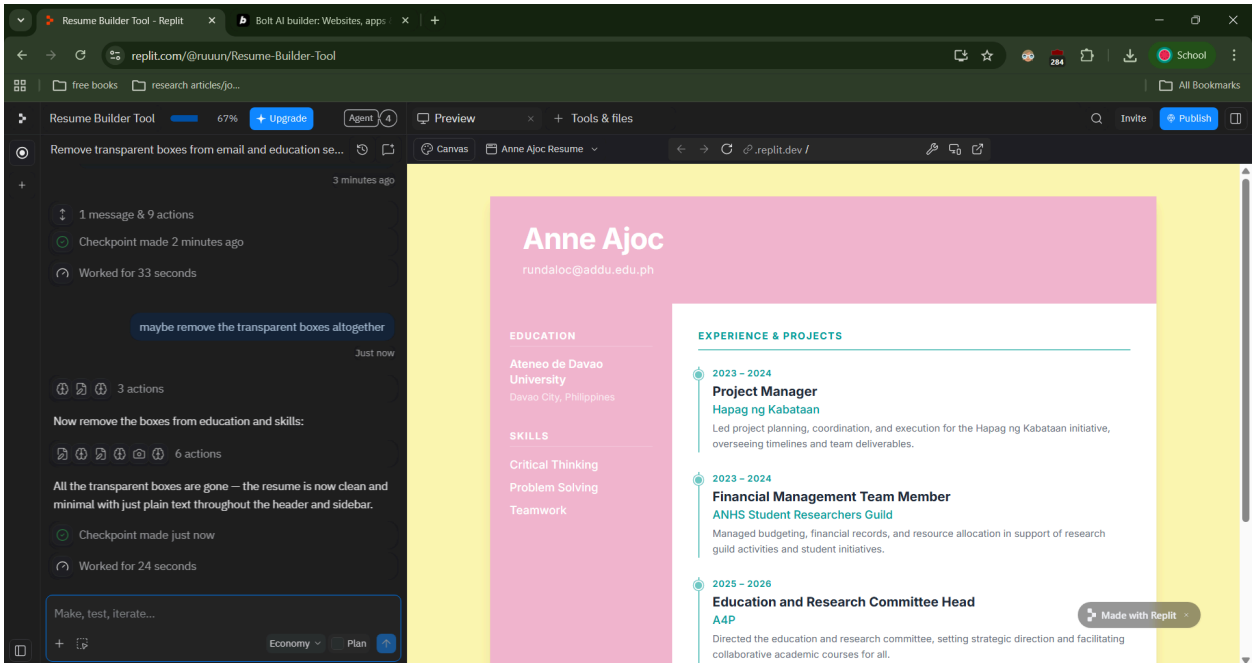


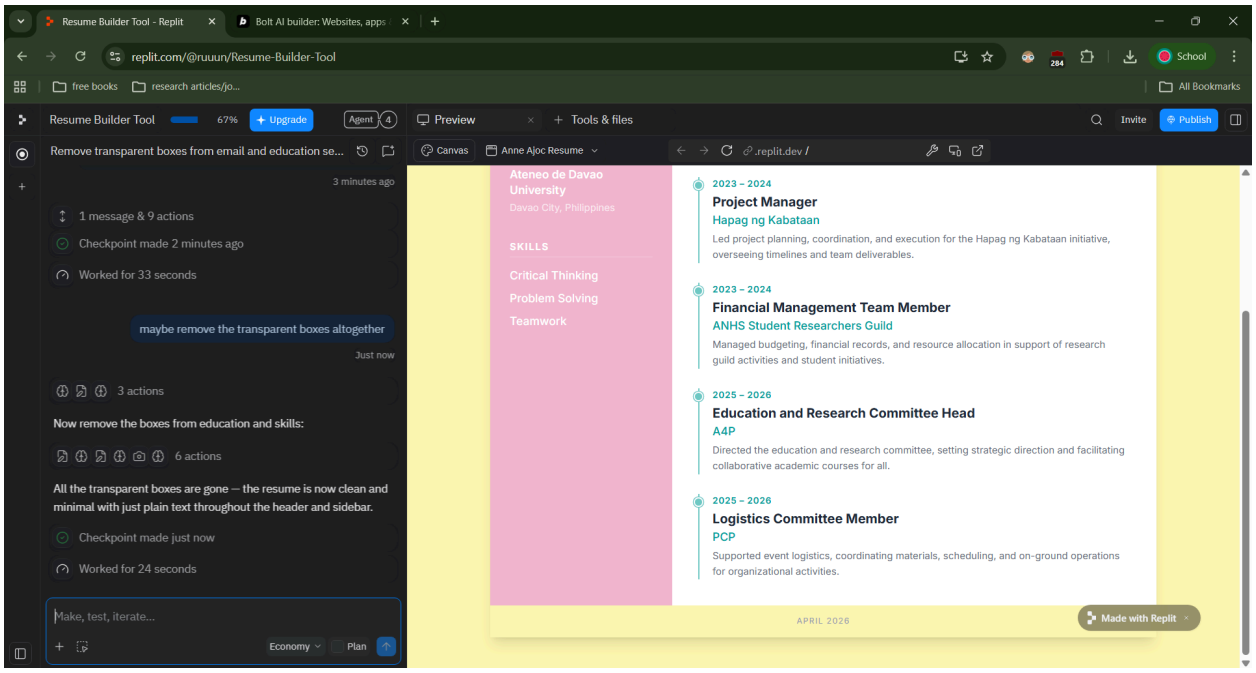
II. Output of the initial prompt on Bolt.new:



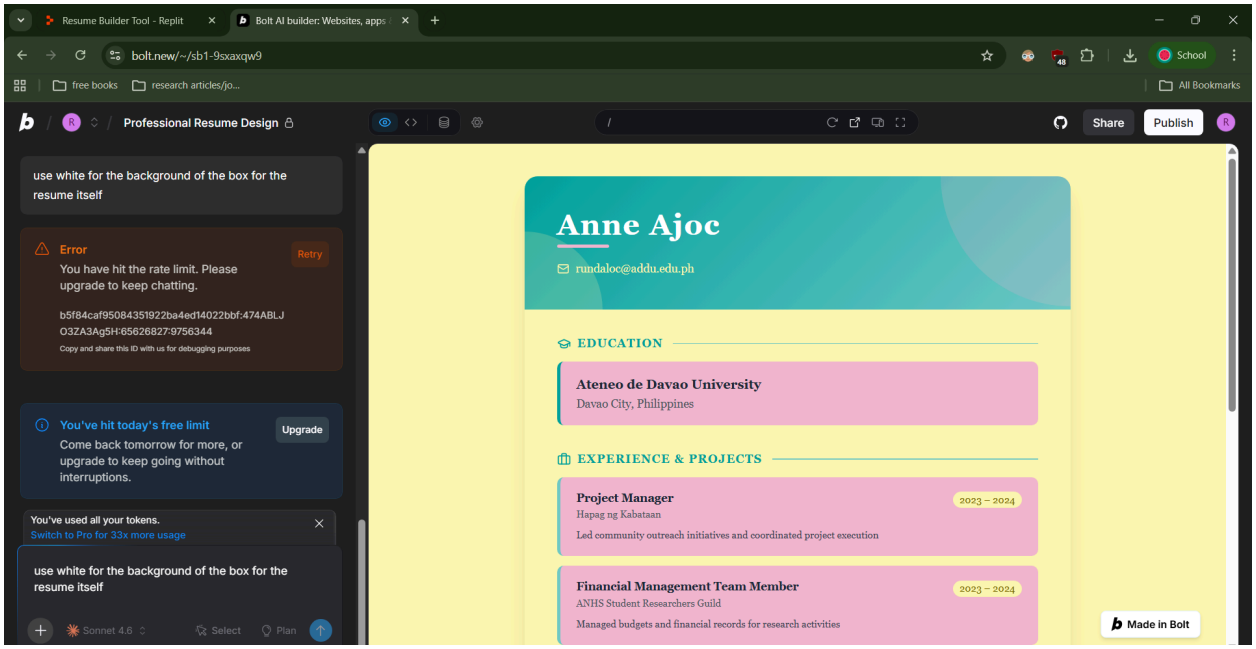


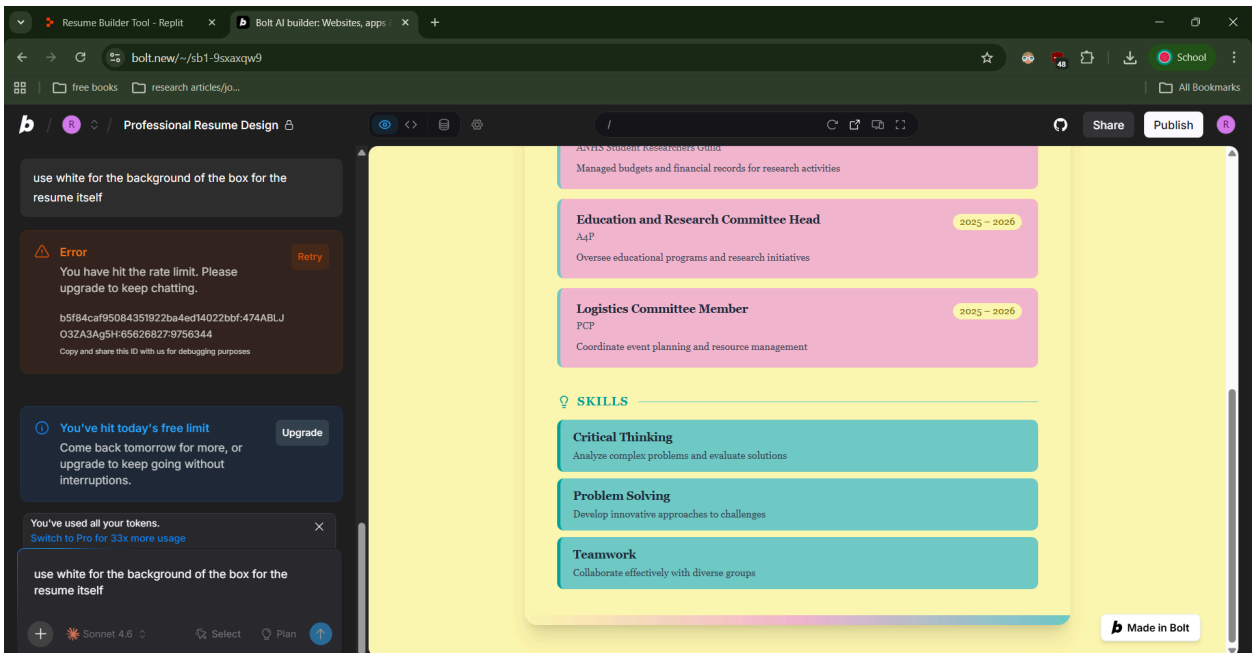
III. Refined output on Replit (hit the free refining limit):





IV. Refined output on Bolt.new (hit the free refining limit):





COMPARISON TABLE

Criteria	LLM #1 (Replit)	LLM #2 (Bolt.new)
Structure	8/10	7/10
Clarity	9/10	8/10
Formatting	7.5/10	7/10
Overall Quality	8/10	7/10

Replit site: need to upgrade to publish unfortunately

Bolt.new site: https://professional-resume-tnc8.bolt.host

REFLECTION

I'd say that Replit performed better, its output has a more organized and concise structure with brief descriptions under each experience compared to Bolt.new, although I do appreciate that Bolt.new follows the exact instructions given. The primary difference that I noticed between the two outputs would be in organization and structure, Replit would generally follow the given instructions and put additional details, while Bolt.new would follow each detail given on the prompt's instructions without adding additional details. Although, I could not refine more in both of the LLM's due to the need for subscribing, my improvements after the initial prompt include changing the color placements so that the resume will supposedly be better on the eyes. Furthermore, I learned that prompting needs exact details, the prompting structure may depend on the specific LLM used, one should be careful as to how the prompt should be structured if there are several details written on the prompt, it is also important to make sure you're using the right words and that at most or generally, your prompt has decent grammatical structure. Overall, I am not satisfied with my final resume's (I need to pay to make further refinements), but this was an interesting learning experience.
